Dear Bergen Resident:

The Town has completed Preliminary Cost Estimates for public water in the Northern and South West areas of the Town. We looked at all the areas combined as one large project, and then broke it down to smaller areas to investigate greater feasibility. However, due to the low density of residents, and the amount of pipe and construction required to service these areas, all the estimates are very high.

A summary of the cost estimates are outlined below and in the opinion of the Town Board they are excessive. This doesn't mean that a public water project can't or won't move ahead, but it would be up to the residents to determine if it's worth the expense. This can be accomplished by way of petition to the board showing a majority of resident property owners that represent a majority of the assessed property value for the area to be serviced.
