Town of Bergen  
October 25, 2016**

**I. Call to Order 7:00pm.**

**Prayer** Almighty God, grant us wisdom that we may remember as we work, that we are servants of our constituency and all our decisions should be in the best interests of the Town and its citizens, entirely unblemished by any thoughts of personal benefit. Bless us with tolerance and understanding for opinions differing from our own and help us keep an open mind in gathering information before voting on all issues. Help us overcome any ignorance of our duties and enable us to learn more of the intricacies of the roles we have assumed. May we rest assured to know You are with us and will guide us through all we do. Amen.

**Clean Energy Communities Program** – As we have indicated G/FLRPC is the Clean Energy Community Coordinator for the Genesee-Finger Lakes Region. To learn more about the Clean Energy Communities Program visit <http://nyserda.ny.gov/cec>. Governor Cuomo recently announced the launch of Clean Energy Communities, a \$16-million initiative to help local governments across the state reduce energy consumption and drive clean energy use in their communities. Local governments that complete four out of ten identified High Impact Actions will earn the Clean Energy Community designation and access to grant funding to implement additional clean energy projects. Those High Impact Actions are as follows:

- Benchmarking – Adopt a policy to report the energy use of municipal buildings on an annual basis and, in large cities, towns, and villages, also adopt legislation requiring the annual disclosure of energy use in large private buildings.
- Clean Energy Upgrades – Achieve a 10 percent reduction in the greenhouse gas emissions from municipal buildings through energy efficiency upgrades and renewable energy.
- LED Street Lights – Convert at least half of the municipal cobra-head-style street lights within the jurisdiction to energy-efficient LED technology.
- Clean Fleets – Install an EV charging station and/or other alternative fuel infrastructure or deploy alternative fuel vehicles in the municipal fleet.
- Solarize – Undertake a solarize campaign to increase the number of solar rooftops in the jurisdiction through group purchasing and locally-organized community education and outreach.
- Unified Solar Permit - Pass legislation to adopt the New York State Unified Solar Permit to reduce costs and delays for solar projects in the jurisdiction.
- Energy Code Enforcement Training – Train code compliance officers and other municipal officials in best practices in energy code enforcement through training, collaborative plans reviews, and joint onsite inspections of local construction projects.

- Climate Smart Communities Certification - Earn Climate Smart Community (CSC) Certification at the certified, bronze, silver or gold levels through compliance with this robust, comprehensive rating system.
- Community Choice Aggregation - Transition to a cleaner, more affordable energy supply by facilitating the aggregated purchase of electric supply for residential and small commercial customers within the jurisdiction.
- Energize NY Finance - Allows property owners to pay back the cost of clean energy upgrades to their commercial or non-profit property through a special charge on their property tax bill.

We will also be running sessions on many of these High Impact Actions at the upcoming Fall 2016 Regional Local Government Workshop (see above) on November 16, 2016 at the Quality Inn & Suites in Batavia, including sessions on the Clean Energy Communities Program, Considerations for Municipal Solar Projects, LED Street Lighting for Municipalities, Community Choice Aggregation, and Planning and Zoning for Solar PV.
